PROFESSIONAL SUMMARY

Backend-focused web developer with 6+ years building and delivering custom CMS and e-commerce solutions for external clients. Experienced across the full stack (Python, PHP, JavaScript, SQL, WordPress) with hands-on API integration and payment gateway implementation. Comfortable working independently or within a team

TECHNICAL & CORE SKILLS

Backend & Web Development: Python, C++, PHP, JavaScript, SQL, WordPress, API Integration, LaTeX

Leadership & Operations: Team Leadership, Production Supervision, Operations Management, Project Coordination, Technical Consulting

Digital & Design: Meta Ads Analysis, Digital Illustration, Visual Content Creation, Brand Identity, Product Retouching

Business: E-commerce Management, Bookkeeping, Business Administration

WORK EXPERIENCES

Web Developer & Consultant (Freelance)

2019 – Present

- Managed end-to-end delivery of custom CMS solutions, coordinating directly with clients to define project scopes and timelines.
- Engineered secure backend architectures, integrating payment gateways and third-party APIs to support various e-commerce models.

General Operation Manager

2021 – 2023

Women's Fashion Brand

Jakarta, Indonesia

- Optimising layout and presentation of the offline and e-commerce storefronts to improve customer experience and increase conversion rates.
- Ran and analyse digital marketing campaigns, utilising data insights to optimise ad budget.
- Oversaw day-to-day operations across social media channels and e-commerce marketplaces to ensure consistent performance.

Production Team & Supervisor

2018 – 2020

Private Printing Company

Jakarta, Indonesia

- Directed production staff and monitored daily output to ensure strict shipping deadlines.
- Managed quality control and optimised printing film materials for cost-effectiveness.

Illustrator, Visual Designer & Consultant (Freelance)

2016 – Present

- Produced custom digital illustrations for merchandise and visual content to elevate client branding across social media and digital storefronts.
- Managed end-to-end creative projects, advising businesses on brand identity while delivering cohesive style guides and logos.

PERSONAL PROJECTS

Culinary Scaler & Cost Calculator - calCOOKlator | *Python, Fast API, deployed on Railway*

- Developed an MVP REST API for recipe scaling, kitchen unit conversion, and food cost calculation using pre-defined recipe datasets.

Automated Resume Pipeline | *LaTeX, YAML, GitHub Actions*

- Developed a CI/CD pipeline that automatically compiles LaTeX source code into a professional PDF on every commit.

EDUCATION

Senior Vocational School (SMK)

Major in Software Engineering (Rekayasa Perangkat Lunak)

2016

Jakarta, Indonesia
